

Imagi-Motive has designed and patented a new concept in tailgating vehicles.

The RTS Series is designed to provide you with all of the features of a completely customized tailgating vehicle, while allowing you to utilize your existing pickup truck..

Customize your tub to your favorite team, your company's theme or to your organization.

You provide us the theme and we'll work with you to make sure that it is the most professional looking unit at the event.

**Removable Tailgating  
System**

#### Here's how it works:

You back under the tailgating tub and lower it into your truck bed using the linear actuators that are in the tub.

You attach your BBQ to your tailgate and head for the game.

Once in your parking spot, you raise the lid on your tub to expose the system.

Hook up your Honda generator (included) and fire it up.

Hook up the keg, set up the microwave and coffee maker.

Lower the big screen TV and open the satellite dish.

Fire up the BBQ and you're ready to tailgate.

#### When your finished

Back under your storage area (garage or H-frame storage rack (optional))

Raise the lid on your tailgate tub

Attach chains to the four corners of the lid

Close the linear actuators and raise the tub out of your truck

Now it's ready for next time and you can use your truck, as usual

#### RTS Series II

This is Imagi-Motive's most popular design for tailgating systems. It incorporates all of the major features of our Custom Tailgating Systems into a removable system that allows you to use your vehicle when you're not tailgating.

The RTS System II comes stock with a 42" flat screen LCD TV, Moto-Sat self-finding satellite system, DVD player, satellite receiver, fiberglass keg-well, tables and chairs to your theme, microwave, 2000 watt Honda generator, beer and fresh water taps on the shoulders of the truck bed, EZ-Up pop up tent, 24" Freedom tailgate BBQ and more. All you have to do is put the RTS Series II tailgating system into your truck, add beer, ice and food for the BBQ and you're ready to go.
